OUR COMMITMENTS

> Our business: designing and manufacturing reliable and high performance helicopter turbines.

> Our continuing primary goal: delivering safe products to our customers.

Progressively deploy our safety policy in **all Turbomeca processes** including on our supplier's premises.

Raise **awareness** of our safety policy among all personnel and customers.

Develop and implement a **safety culture** in all our activities, which recognizes the importance and value of efficient flight safety management.

Establish **objectives**for Turbomeca for
contributing to flight safety,
raise awareness of them among
personnel and measure their
performance in a continuous
improvement approach.

Ensure that the **application** and **improvement** of the flight safety management system is an integral part of all our activities.

Establish and communicate flight safety **responsibilities** to the personnel involved in operational processes.

Guarantee the availability of **financial and material means** and trained and

qualified **human resources** to

implement the flight safety

actions and policy.

Establish, formalize and maintain **cooperative** relations with our partners: airframers, operators, maintenance centers, etc. to promote global flight safety management..

Encourage personnel in a positive direction and guarantee a **non-punitive** work environment that promotes the reporting of events which potentially have a flight safety risk.

Ensure that the personnel involved receives all appropriate **information** and **training** concerning flight safety, that they are competent in fields linked to safety and are only assigned tasks for which they are trained.
