

EngineLife® Customer Portal LOGIN UPDATE

In June 2025, your current login will be updated to a unique email address. To access the EngineLife® Customer Portal, you will need to use your registered email address.

This change is part of Safran's efforts to provide the **best security standards.**

What you need to Do Now

1

Check your email address Before May 30

Once connected to the EngineLife® Customer Portal, check the professional email address already associated to your account in the “My account” section.

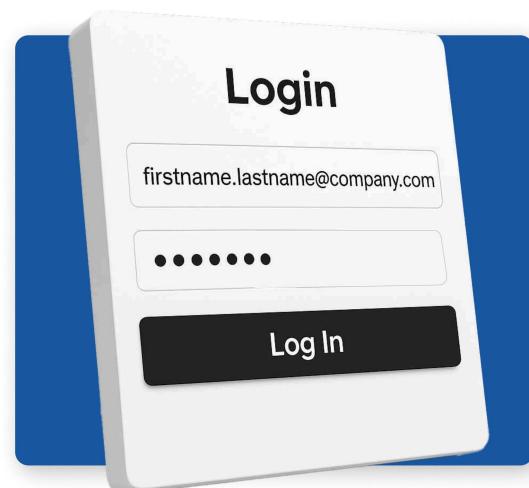

If your registered email address is outdated or already linked to another EngineLife® account, please make sure to update it in your profile before May 30 to ensure uninterrupted access.

2

Use your email to log in and enter your password In June

From June onward, login with usernames will be disabled. Only your registered email address will give you access.

Before your first login, you will receive a link by email to reset your password.

Need Help?

Use the EngineLife® Customer Portal to get in touch, or contact your usual Safran support contact.
