

EngineLife® Customer Portal LOGIN UPDATE

At the end of June, your current login will be updated to a unique email address. To access the EngineLife® Customer Portal, you will need to use your registered email address.

This change is part of Safran's efforts to provide the **best security standards**.

What you need to Do

1 Check your email address

Once connected to the EngineLife® Customer Portal, check the professional email address already associated to your account in the “My account” section.

If your registered email address is outdated or already linked to another EngineLife® account, please make sure to update it now in your profile to ensure uninterrupted access.

2 Use your email to log in and enter your password

End of June

Current LastName_FirstName usernames will be deactivated at the end of June. Only your registered email address will give you access.

Before your first login, you will receive a link by email to reset your password.

Need Help?

Use the EngineLife® Customer Portal to get in touch, or contact your usual Safran support contact.
